Feedback or Prototype le, Fron

1

General

- 1. Have one program That acts as an installation. program for all your files.
- 2. Create a colour scheme reflective of the corupany ethos.

Staff

- 1. Here an emergency contact for the member of staff.
- 2. Make a clear prompt as to how you want the formant of The NI no enterup.
- 3. Will adding staff have restricted access (as it involves user printedpes?).
- 4. Or new Staff I would not display level I accoss
 - 5. When changing staff display their current details so you can verify
 - 6. When deleting staff, display their name so you can veryly its The right one.

Cusbnot.

- 1. Add The field "title" 6 customes.
- 2. Some idea for change
- 3. Some caes for detete.

Stock.

- 1. On your soft stock include descriptions of the stock on the output.
- 2. When newing stock by stock ref I would show all he halds.

Ton 2

Stock conto

- 3. Some feedback for change
- 4. Same feedback for delete.
- 5. Introduce a minimum stock level and search for the stock to be reordered.

Quotes

- 1. When newing a quote inhoduce & signs and set up tates to align quote better.
- 2. Include the date The quote was prepared.
- 3. Some on change
- 4. Some or delete

Bookens schooluling

- 1. When prompted to enter the day (it says
- 2. When I new The schedule of hors the days of the week but no reference to any dates. Courties post part of the mototyping) If not There needs to be referencing to douted
 - 3.e) When adding a tooking of should add a date and it convert to the day automatically b) Do of have to enter each hour seperately?
 - 4) when veising it gives me the reference that will I need someway of knowing where I am going by me week? (take cross referency)

Fign. 3.

Why do you have "clear all schedule"?

Invoices

- 1. Should the option to add invoice " the automatic once a job is complete? would it refer back to the quote at all?
- 2. Should a date I invoice be included?
 - 3. How long is given her an invoice to be paid?
 Should you be searched for unpaid invoices?
 - 4. Same for charge?
 - 5. Same her delete?
 - 6. Would you include VAT seperately in the final calculation?

GENERAL:			
Feedback Point	Accept / Reject	Justification	Re-design requirements
Have one program that acts as an instillation program for all your files	Accept	I believe that the files should all be in one program to help make the installation easier and quicker for the user.	None
Create a colour scheme reflective of the company ethos	Accept	I think that a colour scheme is a great way to represent the company throughout the system.	Change design output to show red lettering on the menus.
STAFF:			
Feedback Point	Accept / Reject	Justification	Re-design requirements
Have an emergency contact for the member of staff	Accept	I think that I should accept this because an emergency number is important for the company to have in case a member of staff suddenly becomes ill or something happens.	Change design input grid to allow a user to enter an emergency mobile number. Change pseudocode to allow number to be entered and validated. Change validation sheet to show validation of this Update inputs to show extra field.
Make a clear prompt as to how you would want the format of the NI	Accept	I think I should accept this because if the user enters it in a different format it may go over the character limit and will not allow them to store it further and it will be lost so it is important the user knows exactly what to do.	Change design input grid to show example format next to input

Will adding staff have restricted	Reject	I have rejected this because there is	None

Update pseudocode
BOOKINGS / SCHEDULES			
Feedback Point When prompted to enter the day it says date	Accept / Reject Accept	Justification I have accepted this because it is an error which could be misleading for the user.	Re-design requirements Change design output grid to say 'day' rather than date.

When I view the schedule it has the	N/A	This does not apply as viewing the	None
days of the week but no reference		schedule by days was only for the	
to any dates		prototype.	
When adding a booking it should	N/A	Prototype does not include dates.	None
add a date and it connect to the			
days automatically			
Do you have to enter each hour	Accept	I have accepted this because it	Amend schedule pseudocode.
separately		means that it takes less time for the	Amend design input grid.
		user to input information since if a	
		job was a week long it would take a	
		lot of a time to add to the schedule.	
When viewing it gives the reference	Partially Accept	I have accepted this because it will	Amend pseudocode
but will I need some way of knowing		be more useful for the user as it	Amend design output grid
where I am going for the week		helps them be more efficient rather	
		than then having to also search for	
		the address however I will not be	
		able to show the address on the	
		schedule since it would not fit so	
		instead I will create an extra menu	
		option allowing the user to see the	
		staff members work for just that	
		day in a list format so the address	
		can also be shown.	
Why do you have 'clear all	Accept	The schedule works in advance so	Remove from pseudocode
schedule'?		you do not need to clear it as you	
		would clear future bookings from	
		the schedule.	
INVOICES:			
Feedback Point	Accept / Reject	Justification	Re-design requirements

Should the option to 'add invoice' be automatic once a job is complete? Would it refer back to	Partially accept	I think that most of the information can be linked from the quote to save time apart from the dates	Update pseudocode to show linking of quote file and removal of fields Update design input grid to remove
the quote at all		worked as this may change due to unforeseen circumstances however everything else can be linked.	fields that are no longer needed Update input/output sheets Update validation sheet
Should a date for the invoice be included?	Accept	I have accepted this because it is important for the staff to know when the invoice was sent to help manage payments and if the customer has still not paid, they can compare it to the date the invoice was given.	Add new field 'dateofinvoice' Update pseudocode Update design input grid Update input / output sheet Update validation sheet
How long is given for all invoices to be paid?	Reject	I do not think this is necessary as it is only a small company so the staff will be able to keep the time of invoices to be paid under control since there is no time limit in place within the original system as most customers pay straight away.	None
Should you be searching for unpaid invoices?	Reject	I believe that we should search for unpaid invoices because it helps the staff feel organised and is an efficient way to contact customers if needed.	None
When changing invoice information display the current details so you can verify	Accept	I have accepted this because the user only enters a reference so if they mistype or are unsure on the reference more information regarding that invoice will appear to ensure it is the correct one before they make any changes.	Update pseudocode

When deleting an invoice display	Accept	I have accepted this because the	Update pseudocode
the current details so you can verify		user only enters a reference so if	
		they mistype or are unsure on the	
		reference more information	
		regarding that invoice will appear to	
		ensure it is the correct one before	
		being deleted.	
Would you include VAT separately	Reject	I have rejected this because VAT is a	None
in the final calculation?		standard shown across all	
		businesses, so it is important this	
		company also sticks to those	
		standards by showing the VAT.

				check that
				the
				forward
				slashes
				are in the
				correct
				place.
				Please
				check that
				the final
				day is
				after the
				start date.
				start date.

finaldesc	Abbreviate d description of the job after it has been completed.	Cha r	50	Bedroom Strip WP Paint ceil and walls	Presence	Makes sure that data has been entered to record to the file.	Please ensure you have entered a descriptio n of the job for the invoice.
inumofday s	The number of days that the job took from the start date to the final date.	Int	Short	7	Presence	Makes sure that data has been entered to allow a calculation for the job to happen.	Please ensure you have entered the number of days you worked.
matprices	The price of the materials paid for during the duration of the job.	Int	Short	100	Range	Makes sure that data has been entered to allow a calculation for the job to happen.	Please ensure you have entered the price of materials.
Mileage	Cost of fuel for travelling to a job each day.	Int	Short	60	Presence	Makes sure that data has been entered to allow a calculation for the job to happen.	Please ensure you have entered the milage costs.
totalprice	The final price of the job all added together. This will be calculated within the program and is not entered by the user and therefore cannot be validated	Floa t	4.2	0590.35			

	upon entry.						
paid	Identifies whether or not the invoice has been paid or not.	Int	short	1	Range	Makes sure that data is between 0 and 1. 0 = No 1 = Yes	Please ensure you have entered whether or not the job has been paid for by choosing either Y or N.
